SUMMARY OF QUALIFICATIONS

Passionate and innovative React and React Native Developer with 2 years of experience transforming ideas into high-performing and impactful digital solutions. Proficient in leveraging the power of React and React Native frameworks, I specialize in creating web and mobile experiences that captivate users and drive business growth. Committed to excellence with a keen eye for detail and a dedication to staying at the forefront of technology trends, I thrive in collaborative environments where I can contribute my expertise in front-end development, UI/UX design, and problem-solving.

KEY COMPETENCIES

- JavaScript (ES6+)
- React (Hooks, Context)
- State Management (Redux, MobX)
- MongoDB
- Version Control (Git, GitHub)
- CSS & Preprocessors (SASS, LESS, GlueStackUI, MaterialUI)
- APIs (RESTful)
- TypeScript
- Firebase
- Node.js

PROFESSIONAL EXPERIENCE

JLCoders | MERN stack

Oct 2023 - Jun 2024

React Web Front-End developer

As a Front-End Developer with the MERN stack, I collaborated with a team to build an administrative app for a mechanical workshop.

- Replaces the current design with a simple and user-friendly design using Bootstrap.
- Developed an administrative area for managing worker profiles and tasks, including add, update, and delete functionalities, with search capabilities by ID or name.
- Acted as the primary point of contact for client communications regarding changes and updates.
- Created an advanced task finder feature allowing workers to search tasks by name, date, and view a list of possible results.
- Updated the object models for tasks and users to enhance scalability for long-term use.

Odlamer | React Native - Expo CLI - Firebase

Sep 2022 - Sep 2023

React Native Front-End developer

Inherited a suboptimal gardening app using React Native. Achieved improved design and feature implementation. Enhanced debugging and boosted performance.

- Successfully integrated third-party APIs including Giphy API and DeepL API, enriching user interactions with dynamic content and multilingual capabilities.
- Innovated by implementing GIFs and images within post comments, enhancing engagement and visual appeal of user interactions.
- Contributed to building the onboarding UI, streamlining user adoption, and implemented OAuth 2.0 for swift and secure user logins through Google and Apple, facilitating profile data building during onboarding.
- React Native, Javascript ES6+, TypeScript, Redux, Firebase, Giphy API, Git, npm, Expo, React Navigation
